

Mini-Assignment 4: Writing a Web Scraper

Myles D. Garvey, Ph.D

Winter, 2020

1. Go to <http://yellowpages.com>. Write R code using `rvest` to search for "pizza" in "wayne, nj". Extract the resulting companies Name and Website. If they do not have a website, then move on and ignore it. (Hint: Study the url patterns for searches in Yellow Pages. This will greatly reduce your effort!)
2. Do the same exact thing as before, but this time use `RSelenium`.
